

# **HMS 300™**

## **Industrial Wireless Sensors Monitoring System**

**Manufactured by**  
iSAC Systems, Toronto, Canada

# HMS 300™ Product Design Options

**HMS 300\_DLW1**

**One Node Efficient  
data logger**

## FEATURES:

- Measure temperature, pressure, moisture and pH signals and store the data in SD-card flash memory.
- Display readings digitally using four LCD panels.
- Sensors failure indicator.
- Memory full indicator.
- Battery Low light indicators.
- Dust proof and waterproof
- AC(120/220V) -DC Main power supply.
- Internal Battery backup supply (3.7V) with estimated life time up to 24 hours.
- Optional adding more industrial sensors with output voltage, serial standard interface (RS232/RS485).
- Dimension: 12" X 12" X 8"
- Simple installation and easy to use.

**Price  
Available  
on request**

## DAQ 300\_DLW2

## One Node Efficient Wireless data logger

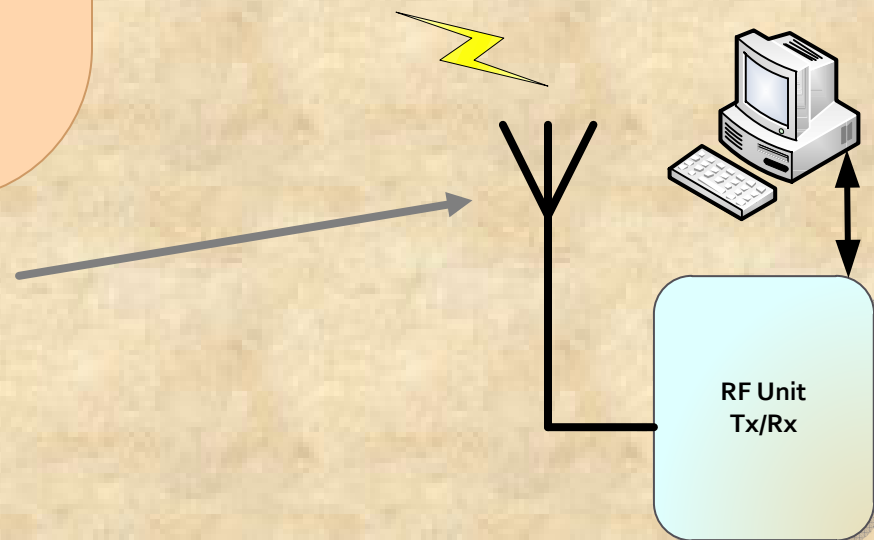

### FEATURES:

- Measure temperature, pressure, moisture and pH signals and store the data in SD-card flash memory.
- Display readings digitally using four LCD panels.
- Sensors failure indicator.
- Battery Low light indicator.
- Send the readings wirelessly to remote base station.
- Transmitter Data storage is activated when RF link break.
- Memory full indicator.
- Received sensors readings are displayed graphically using developed GUI.
- Internal Battery backup supply for the sensor node PCB with other dimension and power features of HMS 300\_DLW1.
- RF Link failure indicators at both Sensor node and base-station.

Price  
Available  
on request

## HMS 300\_DLW3

Optional LCD display at  
the receive side

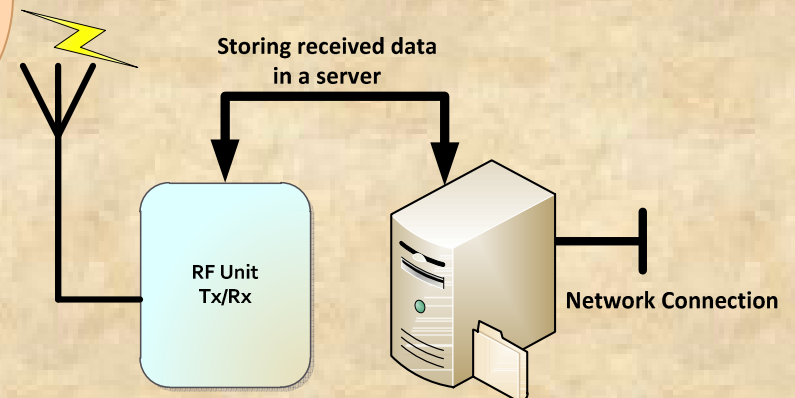

# HMS 300\_DLW4

## One Node Wireless data logger with Network Connection

### FEATURES:

- Measure temperature, pressure, moisture and pH signals and store the data in SD-card flash memory.
- Display readings digitally using four LCD panels.
- Sensors failure indicator.
- Battery Low light indicator.
- Send the readings wirelessly to remote base station.
- Transmitter Data storage is activated when RF link break.
- Memory full indicator.
- Received sensors readings can be monitored graphically through web connection.
- Received data are stored in a server or embedded PC.
- Internal Battery backup supply for the sensor node PCB with other dimension and power features of DAQ300\_DLW1.
- RF Link failure indicators at both Sensor node and base-station.

Price  
Available  
on request

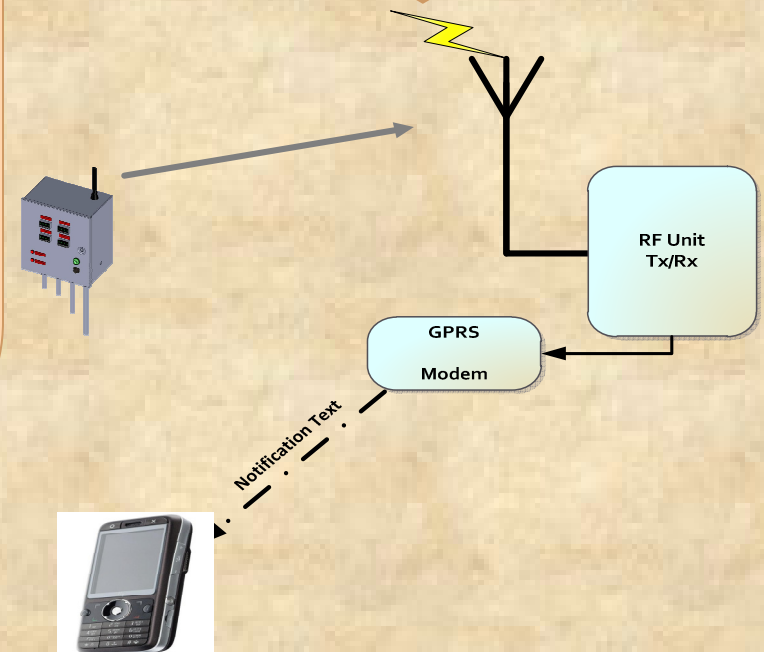

# HMS 300\_DLW5

## One Node Wireless data logger with Mobile alert

### FEATURES:

- Measure temperature, pressure, moisture and pH signals and store the data in SD-card flash memory.
- Display readings digitally using four LCD panels.
- Sensors failure indicator.
- Battery Low light indicator.
- Send the readings wirelessly to remote base station.
- Transmitter Data storage is activated when RF link break.
- Memory full indicator.
- Received sensors readings can be sent with alerts to a mobile through GPRS modem interface.
- Internal Battery backup supply for the sensor node PCB with other dimension and power features of DAQ300\_DLW1.
- RF Link failure indicators at both Sensor node and base-station.

Available  
on request

**HMS 300\_DLW6**

**One Node Wireless  
with Network and  
Mobile monitoring**

**Combined features**

**HMS 300\_DLW5 HMS 300\_DLW4**

**Price  
Available  
on request**

HMS300 unit with  
sensors probes and  
backup battery supply

Storing received data  
in a server

Network Connection

**Receiver Base Station**
